TOGETHER ON CYBER

HOW WE CAN SUPPORT YOUR NIS2 IMPLEMENTATION

On **3 April 2026**, new cybersecurity regulations implementing the NIS2 Directive in Poland will enter into force.

The new cyber requirements apply to **as many as 18 sectors of the economy**, including: energy, transport, banking and financial markets, healthcare, drinking water, wastewater, digital infrastructure, digital services, ICT services, postal services, waste management, food, chemicals and manufacturing (in particular, medical devices, electronic equipment and vehicles).

TIMELINE OF ACTIONS

By 3 October 2026

Self identification and registration as an essential or important entity

By 3 April 2027

Implementation of an information security management system and delivery of training within the organisation

By 3 April 2028

First cybersecurity audit for essential entities

WE CAN HELP YOU IMPLEMENT THE NEW CYBER REQUIREMENTS IN YOUR ORGANISATION

- » **Self identification** – we will verify whether you are an essential or important entity and whether you fall under the new obligations in Poland.
- » **Registration** – we will support you in the process of registering as an essential or important entity.
- » **Information security system** – we will assist in implementing an information security management system within your organisation (policies, procedures, analyses, processes).
- » **Training** – we will provide cybersecurity training for management and employees and design cyber hygiene guidelines.
- » **Supplier relations** – we will prepare agreements with software and ICT hardware suppliers, support you in negotiating such agreements in the area of cybersecurity and design a supplier verification process.

FAILURE TO IMPLEMENT NIS2 IN YOUR ORGANISATION CARRIES THE RISK OF, I.A.:

- » **financial penalties** – fines of up to EUR 10 million or 2% of annual turnover (essential entities) and up to EUR 7 million or 1.4% of annual turnover (important entities), with the higher amount applying,
- » **personal liability for management** – financial penalties for management board members of up to 300% of remuneration and the possibility of being banned from performing management functions until non compliance is remedied or violations cease (for essential entities),
- » **loss of reputation** – public disclosure of an incident or an obligation to notify customers,
- » **high operational costs** – the costs of system downtime or recovery after an incident often exceed the cost of implementing an information security management system.

If you have questions or are unsure where to start with NIS2, get in touch with us!
